Dear Supervisor,

At the moment, you are hosting one of our students for their graduation project at your company/institution. In this letter, we would like to provide essential information about the graduation project at the Academy of Applied Bioscience and Chemistry.

Nijmegen, 18 september 2025

Subject
Graduation Project

Aim of the graduation project

In the first years of the degree programme, our students learn to plan, carry out research projects and report in an educational setting. During a 20-week internship prior to the graduation project, students apply their knowledge and skills in a professional work environment. During the graduation project there is an increased emphasis on developing the independence to plan and carry out a research project, and to publish the results in a research report.

The most important aim of the graduation project is that the student demonstrates the required competencies to be able to independently carry out research. The graduation project is thus a test of aptitude for the degree, Bachelor of Science.

Duration of the graduation project

The duration of the graduation project is 20 weeks; this corresponds to a maximum of 100 working days. The student must work a minimum of 90 days in order to qualify for assessment. If, due to unforeseen circumstances such as illness, the student is unable to complete the 20 weeks, the need for an extension will be discussed between you and the HAN supervisor.

Assessment of the graduation project

The assessment of the graduation project has three components.

1. The assessment of practical work (assessed by you, the workplace supervisor, using the relevant assessment form in the attachment).
2. The assessment of the research report (assessed by the HAN).
3. The assessment of the graduation examination (assessed by the HAN).

Each component is worth 1/3 of the end grade.

There are 5 graduation sittings per year: In January, April, June, August or November. Each sitting has a submission deadline for the research report; these are published in the academic calendar. You will be informed of the date by the student. At the graduation sitting two HAN lecturers, an external committee member and yourself will be present.

What is expected of you

As the supervisor of a graduation project, you have a significant and critical role in the student's development and demonstration of the required level for the Bachelor degree. To ensure that this process runs smoothly, we have compiled some guidelines and essential expectations of you, as supervisor (or the colleague who is the primary supervisor):

- Be sufficiently available to the student for questions that arise.
- Provide the essential supervision for the student to write the research plan and report.
- Complete the form: 'Practical Work Assessment Form' twice. The first time will be halfway through the project duration as a formative assessment. You may not be able to completely fill in the form at this stage, however discuss the assessment with the student, using it to give constructive feedback on positive aspects, and areas for improvement. The second time will be at the end of the graduation project as a summative assessment.
- Attend (if possible) the graduation sitting. You will receive an email invitation from the Internship and Placement Office.

What you can expect from us

Every student is allocated a HAN supervisor for the graduation project. The contact details of both parties can be found below.

- The HAN supervisor is available for any questions via email and telephone.
- The HAN supervisor will visit the graduation project location once, often around the midpoint of the project duration. If the location is outside the Netherlands, this visit will be via a Skype link.

Contact Details

Student name : Ryan Engels
Email address : RMH.Engels@student.han.nl

HAN supervisor name : Thijn van Kempen
Telephone number :
Email address : Thijn.vanKempen@han.nl

If you have any further questions, please do not hesitate to contact the HAN supervisor.

Kind regards,
On behalf of the Internship Office

Jolanda Zandbergen
